

DEV_IMPL_GUIDE - FE-APP-04 Customer Self-Care Frontoffice App

1. Implementation Objective

Implement the customer self-care app for customer profile visibility, subscription summary, invoices, wallet/payment, support tickets, notification preferences, and allowed self-service actions.

3. Build Order

1. Implement login/account binding and customer profile read.
2. Implement active subscription summary from SUB-LM.
3. Implement invoice list/detail/PDF through billing read/file APIs.
4. Implement balance/wallet/payment status through BIL/PAY-GW.
5. Implement ticket creation/status through TCK/ASR types.
6. Implement notification preferences through NOT.
7. Add limited self-service commands only when owning SUB-WF APIs are enabled.

4. MVP Scope

First release: profile, subscription summary, invoices, payment status/instructions, ticket create/status, preferences. Defer complex package changes, relocation, migration, and advanced Customer 360 detail.

5. Tests

- Customer sees own data only.
- Invoice PDF authorization.
- Payment status refresh.
- Ticket creation idempotency.
- Partial module outage.
- Logout clears local cache.
