

Sophix V3 DD Audit Response

Date: 2026-06-01

This document records the corrections applied after the first DD/frontend audit report.

Applied Corrections

Finding	Decision	Documents patched
F1 Customer/Account anchoring	Adopt account_id as operational anchor. Keep customer_id as denormalized identity/search context.	SUB-LM, BIL-01-PAY-01, BIL-01-CN-01, BIL-02 Core, BIL-02 READ, HLD, FE-APP-01, FE-APP-04.
F2 Notification ownership leakage	Callers pass event kind and variables only. NOT-01 owns template, channel, language, fallback, and retry policy.	OSR-RMA Framework, OSR-RMA guide, ASR-02, ASR-02 guide, NOT-01.
F3 RLM-CFG-01 monolith	Added workstream split and implementation order. Full physical split remains a follow-up because the source DD still carries the preserved detailed contract.	RLM-CFG-01, RLM-CFG-01 guide.
F4 Frontend guide depth	Expanded Wave-1 frontend guides with API wiring, state models, command flows, offline queues, and conflict handling.	FE-APP-00, FE-APP-01, FE-APP-02, FE-APP-03 guides.
F5 Camunda REST example depth	Added concrete start, fetchAndLock, complete, and message examples to SUB-WF framework.	SUB-WF-FRAMEWORK-01.
F6 Superseded EM-02 in pack	Distribution pack now excludes the superseded Contractor_Team_Agent_Registry pair while retaining source files for traceability.	tools/build_complete_pdf_pack.py; DD_INDEX already records canonical EM-02.
F7 Legacy names	Replaced live Supercontroller wording with capability-named Network Provisioning Adapter; replaced legacy import sample values with neutral provenance values.	OSR-INSTANCE-01, EM-01 and guide.
F8 API convention drift	Standardized active HLD/source examples to {subscription_id} where patched. RESTRICT remains a documented sub-resource exception because restrictions are listable/addable/removable while the subscription stays ACTIVE.	HLD, SUB-WF framework, FUL activation/cancellation references, RESTRICT DD.
V1 Consent ledger	Added append-only customer_consent_ledger; NOT-01 consumes preferences/consent state but does not own capture.	ILM-CFG-01, NOT-01.
V2 Franchise commissions	Confirmed deliberate deferral. SALES-01 records attribution only; payable commission logic remains future finance/commission DD.	SALES-01.
V3 ASR template ownership	Confirmed ASR templates are canned agent answers, not NOT-01 delivery templates.	ASR-02 and guide.

Known Follow-Up

RLM-CFG-01 should still be physically split into smaller source DDs in a future cleanup pass:

1. RLM-CFG-01A Core HomePass Catalog.
2. RLM-CFG-01B Coverage And Topology Reference.
3. RLM-CFG-01C Territory And Contractor Mapping.
4. RLM-CFG-01D Rules And Workflow.

The current DD now tells implementers how to split the work, but the file itself remains detailed to preserve the reviewed source contract.
